

Application No. 10/029,313

**AMENDMENT TO THE SPECIFICATION:**

Please substitute the following amended Abstract for the pending Abstract beginning on page 22, line 2.

**ABSTRACT**

A device and method for creating multiple punch holes during a finishing process of paper sheets and other sheet materials. The improved sheet punch ~~comprises~~ including two rotatable punches set at different angles such that when one intersects the sheet path, the other clears the sheet path. The speed of rotation is controlled such that the non-selected punch intersects the sheet path in a space between pitches.
